ENGINEERING CYBERNETICS

1967

CONTENTS

Number 1

R. L. Stratonovich: Generalization of Pontryagin's Maximum Principle. 1
A. A. Pervozvanskiy: Relationship between the Basic Theorems of Mathematical Programming and the Maximum Principle 6
L. I. Feygin: Effect of Disturbances on Scheduling 11
L. Virag: Automatic Optimization of a Linear Diophantine Object 15
V. V. Rykov and E. Ye. Lembert: Optimal Dynamic Priorities in Single Queueing Systems 21
S. M. Brodi and O. N. Vlasenko: Reliability of Systems with a Variable Utilization Mode 30
Yu. A. Slepov: Reliability of Repairable Multiaction Devices 35
L. K. Isayev and N. A. Mamed-Zade: Reliability Optimization of a Redundant System. . 38
O. G. Alekseyev: Optimal Redundancy 41
V. V. Malev: Characteristic of the Probability Distribution of Correct Operation of Emergency Systems 46
I. B. Hertzbach: Preventive Maintenance Using Prognosis Parameter 54
Ye. Yu. Barzilovich: Maintenance of Complex Technical Systems, II (Survey) 63
V. I. Siforov: Problems in Information Transmission and Processing (Survey) 75
Yu. N. Mel'nikov: Reliability of Information Transmission in Complex Systems Which Use Computers 82
Yu. G. Dadayev: A Decoding Method for Arithmetic Codes with Single Error Correction 88
R. I. Polonnikov and V. V. Aleksandrov: A Procedure for Pattern Recognition 92
P. D. Krut'ko: Relationship of Dynamic Programming to Lyapunov Functions in Analytic Design of Discrete Systems 106
I. P. Lytkin: Best Approximation to Optimal Control 111
V. K. Chichinadze: Random Search to Determine the Extremum of the Functions of Several Variables. 115
R. T. Yanushevskiy: A Class of Problems in Multidimensional Control 124
O. N. Fomenko: Accuracy of Nonlinear Control Systems with Random Parameters . . . 131
Yu. I. Parayev: Predicting the Trajectories of Stochastic Systems with an Inertial Metering Device 139
G. L. Degtyarev and T. K. Sirazetdinov: Optimal Control of Systems with Distributed Parameters. 153
V. M. Boychenko, V. S. Gladkiy and Ye. M. Chernyy: Analog Probability Simulation of Systems with Unreliable Elements 164

N.N. Golub': Optimal Control of Monocrystal Pulling from a Melt 176
V.P. Fedyanin: On the Article by O.B. Kleshko: "Synthesis of Linear Automatic Systems with Respect to Minimum Mean-Square Error Taking into Account the Invariable Part of the System" 181
G.S. Pospelov: The Third Congress of the International Federation on Automatic Control (IFAC) 186
I.A. Ushakov: The Fourth International Conference on Operations Research 191

Number 2

V.M. Ponomarev: Sequential Optimization in Control Problems 1
B.A. Grishanin: Information Costs in the Theory of Information Value 6
Yu.A. Kochetkov: A Priori Information in the Least Squares Method 14
I.N. Kuznetsov: The Minimax Problem for an Arbitrary Payoff Function 28
K.S. Zherbin and A.A. Pervozvanskiy: Efficiency of Repairable Control Systems . . . 36
V.G. Latysh: Separating Groups of Unresolved Signals from Noise Using Random Point Theory 42
Yu.K. Belyayev, T.N. Dugina and Ye.V. Chepurin: The Lower Confidence Bound for the Probability of Trouble-Free Operation of Complex Systems 52
Sh.L. Bebiashvili, O.M. Namicheyshvili and A.P. Khuskivadze: The Average Time of Trouble-Free Operation of a Complex System 59
V.S. Zaritskiy: Determination of the Probability that a One-Dimensional Markov Process will not Reach the Fixed Boundaries 65
G.P. Basharin: Servicing of Two Flows with a Relative Priority in a Fully Accessible System with a Restricted Number of Places for Waiting 72
Ye.B. Veklerov: Optimal Absolute Dynamic Priorities in Queueing Systems 87
Ye.K. Degtyarev: Stochastic Models of Operation of Asynchronous Digital Computers 91
Ye.N. Vavilov and D.B. Shishkov: Economical Encoding of Automata 103
Zh. Toshich: Polynomial Representations in a Class of Three-Valued Logic 113
G.I. Bel'chanskiy: Evaluation of a Nonlinear Function when Observing a Signal Containing Noise 118
G.N. Balasanov and B.A. Chumachenko: Algorithms for Processing Random Signals by the Monte-Carlo Method 130
L.G. Yevlanov: Investigation of Optimal Systems Using Nonlinear Combination of Useful Signal and Noise 138
G.A. Medvedev and A.I. Ruban: Automatic Search System Using Step Signals 146
K.A. Pupkov and G.G. Sebryakov: Orthogonal Polynomials for Nonlinear Control Systems with Random Signals 158
A.S. Kholevo: Iteration Method for Optimal Nonlinear Filter for a Stationary Random Process 170
Nguyan Thuc Loan: A Method for Investigating Nonlinear Control Systems 176
V.A. Vittikh: The VIII All-Union Conference on Automatic Control and Electrometering Procedures 183

Number 3

G.N. Balasanov: Optimal Control of Industrial Production Processes 1
Kh.Sh. Margulis and G.Ya. Fridman: Statistical Model of an Industrial Plant 7
I.N. Kuznetsov and A.D. Lobanova: Comparison of Two Procedures for the Optimal Distribution of Limited Resources 13
V.M. Ponomarev and A.I. Ptushkin: Sequential Optimization of a Discrete Control System 18
S.S. Lebedev: A Problem of Integral Convex Programming 23
N.I. Arbuzova: Stochastic-Stability of the Solution of a Problem of Quadratic Programming 33
V.V. Podinovskiy: The Problem of Existence of Solutions of Optimization Problems With Fixed Time 40

V. A. Petrov and G. V. Lavinskiy: Dynamic Programming Used for Checking Hypotheses 45
A. D. Ioffe: Variational Problem Transformations. I 50
S. V. Trufanov: Some Problems of Distance on a Graph 60
Yu. K. Belyayev, T. N. Dugina and Ye. V. Chepurin: Lower Confidence Bound for the Probability of Fail-Free Operation of Complex Systems. II 67
A. M. Gorlin and A. Ye. Lobovskiy: Optimal Maintenance Conditions of an Automatic System 78
N. M. Vorob'yev: Control of One Type of Queueing System 84
V. M. Boychenko and A. A. Nersesyants: Transformation of a Stationary Poisson Flow into a Nonstationary Linearly Dependent Flow 92
A. L. Lunts and V. L. Brailovskiy: Evaluation of Attributes Obtained in Statistical Decision Rules 98
A. Ya. Burinskiy: Construction of the Distribution Function in Pattern Recognition Problems 110
A. N. Melikhov and Yu. A. Dvoryantsev: Set Theory and Algebraic Operations on Finite Automata 116
G. V. Kreynin, V. G. Lazarev and Ye. I. Piyl': The Synthesis of a Type of Microprogram Automata 126
Ye. N. Vavilov and L. P. Lobanov: Automata With Minimum Frequency of Use of Memory Elements 132
V. I. Korneychuk, A. M. Romankevich, L. S. Sitnikov and L. L. Utyakov: Multivalued Logical Elements With the Pulse Phase Principle of Representation of Information 136
Zh. Toshich: Polynomial Representations of Boolean Functions and Their Minimization 140
V. L. Levshin: Characteristics of Spatial Filtration of Some Types of Electronic-Optical Direction-Finder Scanners 143
M. V. Maksimov: Mathematical Models of Multichannel Radio Engineering Devices in the Presence of Radio Noise 156
V. A. Morozov: Sequential Decoding Optimal With Respect to Error Probability ... 162
V. I. Petrov: A Discrete Terminal State Control System 167
M. M. Makarchuk: Identification of a Class of Nonlinear Objects 175
L. G. Yevlanov: Multidimensional Optimal Filters for a Nonlinear Combination of Useful Signal and Noise 182

Number 4

B. N. Petrov, I. D. Kochubiyevskiy and G. M. Ulanov: Information Aspects of Industrial Process Control 1
A. D. Ioffe: Transformations of Variational Problems. II 12
E. M. Vaysbord: Asymptotic Estimates of the Rate of Convergence of Random Search 22
N. V. Khovanov: Stochastic Optimization of Parameters by the Method of Variation of the Search Region 33
L. M. Abol'nikov: A Multichannel Queueing System with Group Arrival of Demands .. 39
V. A. Ivnitskiy: An Approach to the Statistical Evaluation of System Reliability 48
Ye. I. Vorob'yev and Yu. L. Solov'yev: Determining the Quantitive Influence of Various Factors on the Intensity of Failure of Elements of Automatic Systems .. 56
B. B. Buyanov, L. B. Groysberg, S. M. Domanitskiy, V. M. Ozernoy, Ye. D. Kharlamova and N. V. Shmaylo: A Procedure for Investigating the Reliability of Complex Logical Control Systems by Statistical Simulation 61
A. G. Frantsuz: Influence of Correlations Between Attributes on Their Informativeness for Pattern Recognition 64
Ye. A. Gurvits: Synthesis of a Type of Synchronous Automaton 68
B. A. Vlasyuk: Optimal Scheduling of Parts Processing on Three Sequential Machines 76
I. A. Ushakov: An Algorithm for Checking the Connectedness of a Graph 82
Ye. A. Drozdov: Consideration of Element Characteristics when Constructing Combination Systems 84
G. Kh. Babich and V. V. Bel'giy: Conversion of a Digital Code into Voltage Using Incremental Integration 93

T. A. Letova: The Synthesis of Autonomous Controls. I 101
A. G. Aleksandrov: The Inverse Problem of Synthesis of Optimal Control 112
A. Ya. Andriyenko: The Method of Statistical Optimization of Nonlinear Discrete-Time Automatic Control Systems 120
Yu. N. Chekhovoy: A Form of Stability of Nonlinear Pulse Systems 131
S. G. Duvanov and L. N. Lipatov: Synthesis of Correction Systems with Finite Memory 138
Ye. A. Sankovskiy and V. V. Kruglikov: Statistical Investigation of a Self-Adjusting System with a Standard Model 148
K. I. Baykin: An Extremal Self-Adjusting System Based on Measurement of Phase Shift 154
I. N. Pechorina and Yu. A. Baryshnikov: The Quasi-Static Condition of the Parametric Circuit of a Self-Adjusting System With a Spectral Analyzer 159
Yu. M. Korshunov, A. I. Bobikov and V. N. Stepanenko: Improving the Quality of Digital Smoothing Devices 166
V. P. Bulekov and F. A. Mikhaylov: Dynamic Properties and Characteristics of Nonstationary, Linear Systems 171
V. V. Vasil'yev: Search Time for a Periodic Pulse Sequence in a Pulse Flow Using Triggers 180
Yu. A. Gopp: Comments on the Article by N. N. Korobov "Evaluating the Efficiency of Automatic Control Systems Which are Self-Adjusting With Respect to the Input Signal" 185
N. N. Korobov: Reply to the Remarks by Yu. A. Gopp 188

Number 5

B. N. Petrov: Cybernetics and the Progress of Technology 1
N. N. Krasovskiy and N. N. Moiseyev: The Theory of Optimal Control Systems 8
D. B. Yudin: Synthesis of Linear Predicting Filters With Respect to Complex Statistical Quality Criteria. I 19
G. S. Pospelov and A. A. Poduzov: Control and Modeling Problems in Mathematical Economics 31
A. A. Krasovskiy: The Fokker-Planck-Kolmogorov Equation and the Synthesis of Relay Control Systems 45
R. L. Stratonovich: Extremal Problems of Information Theory and Dynamic Programming 54
Ya. Z. Tsypkin and G. K. Kel'mans: Recursive Self-Training Algorithms 70
B. V. Gnedenko and I. N. Kovalenko: Some Problems in Queueing Theory 80
O. I. Bronshteyn and Ye. B. Veklerov: A Controlled Queueing System 90
G. P. Basharin: Servicing Two Flows in a Single Queue-System With a Limited Number of Places for Waiting and Absolute Priority 95
I. A. Ushakov: Evaluating the Reliability of a Hierarchical System With Dissimilar Actuating Elements 106
Yu. M. Gorskiy and V. V. Novorusskiy: A Procedure for Probabilistic Evaluation of the Reliability of Hypotheses in Complex Diagnostic Problems 110
D. A. Pospelov: Classification of Computer Algorithms 117
I. B. Sirodzha: Geometric Pattern Recognition Algorithm 123
D. I. Kirvelis and N. V. Pozin: Simple Logical Neuron Systems and an Example of a Classifier 134
V. Yu. Rutkovskiy: Self-Adjusting Systems in Automatic Control 140
Ye. I. Gerashchenko: Synthesis and Analysis of Nonlinear Automatic Systems by the Motion Division Method 151
Ye. P. Popov: Separation of a Controllable Process With Respect to Frequencies During Approximate Investigation of Nonlinear Systems 168
B. V. Viktorov: Special Features of Behavior of Control Systems With Sharply Different Rates of the Motion Components 177
T. A. Letova: Synthesis of Autonomic Controls. II 183

Number 6

D. B. Yudin: Synthesis of Linear Predicting Systems Using Complex Statistical Quality Criteria. II 1
B. S. Fleyshman and V. F. Krapivin: Application of Game Theoretical Methods to Evaluation of the Viability of Complex Systems 12
V. S. Pugachev: Statistical Theory of Automatic Learning Systems. 24
V. P. Zelenen'kiy: A Class of Information Processing Problems at the Output of a Communication Line 41
V. V. Kiryukhin: Optimal Distribution of Resources with Additive Purpose Functions 47
V. A. Barishpolets: Stochastic Pert Planning. II 52
O. S. Gorbacheva: Dynamic Programming and Optimal Placement of Wells 62
I. A. Ushakov: A Generalization of Sliding Duplication 67
B. A. Miskevich: Reliability of a System with Spares and Limited Repair 71
V. S. Zaritskiy and L. S. Sonin: Determining the Probability of False Failure in Automatic Monitoring 78
Ye. A. Drozdov: Graphical-Analytical Method of Evaluating the Quality of Digital Automata Designs 85
S. P. Kartasheva: Rational Encoding of Automata Using Canonical Graphs. I 91
A. V. Kobchikov: Method for Obtaining Binary Symbols with a Given Probability of Their Occurrence 105
M. M. Gerdov: A Method of Numerical Analysis of Complex Systems 110
A. M. Tomashpol'skiy: Algorithm for Solution of a System of Logical Equations for Majorital Decomposition of Two-Valued Logic Functions 117
Yu. V. Vagin: Evaluating the Effectiveness of Parameters Used when Classifying Objects or Phenomena 123
A. I. Petrov and V. I. Kukhtenko: A Method of Synthesis of Self-Adjusting Systems for Stabilization of Dynamic Characteristics 130
N. N. Leonov: An Extremal System of the Step Type with an Inertial Plant. 139
A. S. Protopopov: The Response of Dense Compound Filters to Smooth Signals. 148
